Alon Kashtan – CV

Hi! My name is Alon Kashtan. I'm an experienced software architect and developer who is excited about code and solving difficult problems. I bring 12 years of hands-on experience with both code and architecture, I learn quickly, and I bring with me wide knowledge, a creative approach, commitment to the organization, great teamwork and passion for the profession.

I am currently looking for an architect position in a great place.

Experience   Previous positions

Chief Architect   2017-Today, Major in Ofek (Israeli Air-Force)

Chief architect, team leader and the visionary in the largest modern software project in the IDF.

- Team leader of 4 architects. Together we led an IDF wide revolution in software development.
- Envisioned, planned and assisted in the implementation of large scale enterprise-and-military-grade microservices based solution.
- Led IDF-wide architecture decisions and standards.

#Technologies: Java, javascript, TypeScript, Spring Boot, Hibernate, NodeJS, AngularJS, PostgreS, Docker, OpenShift, NGINX

Chief Architect   2014-2017, Major in Ofek (Israeli Air-Force)

Chief architect and team leader in the largest system in the IAF.

- Team leader of 2 architects with direct professional authority over 50 developers.
- Led many "modernizing" changes in the system and Mentored teams in moving to agile development.
- Initiated and led a plan of migration of the system to modern architecture, technology and UX.

#Technologies: Java, Spring Boot, Web Sphere, Oracle DB

System Engineer   2012-2014, Captain in Ofek (Israeli Air-Force)

Engineer of a large critical real-time system.

- Led all design aspects of the system: requirement, architecture, performance, sub-contractor's design etc.
- Designed a mission-critical system that needs to stand up to strict load, latency and availability requirements.
- A completely asynchronous, highly distributed and high performant algorithmic system with multi-tenancy support and a multi-zone hi-availability architecture.

#Technologies: Java, DDS, RTI

+2 more   2007-2012, Ofek (Israeli Air-Force)

As a developer and as a system engineer. At this time adopted and led the use of WPF in the Air-Force.

#Technologies: C#, DotNet 4, WPF, WCF, mPrest frameworks, NHibernate, Oracle Coherence

Education   Sources of wisdom

Institute	Years	Degree
The Open University	2015-TODAY	MSc Computer Science
The Hebrew University Jerusalem	2004-2007	BSc Computer Science

Experties & Additional skills   more than just an architect

Microservices	Large scale solutions	Lectures
An IDF Microservices leader	Looking at enterprise-wide and technology specific concerns, at the same time	Love to share knowledge in a way that people love to receive
